

Alberta Health

AADL Approved Product List - Prosthetic Benefits

Pricing effective April 1, 2019

General Information

Generic Pricing Procedure

Use the AADL Generic Calculator to determine the AADL price for a generic catalogue number. Generic catalogue numbers have their prices indicated as a "Max". Most generic catalogue numbers start with an "N". All generic catalogue numbers are considered to be "Upgrades". The Generic Calculator provides the amount of the upgrade. The Specialty Supplier is not required to bill the upgrade amount, however, must not bill the client more than the amount indicated in the calculator as an upgrade. Refer to the General Policies and Procedures Manual for more information about upgrade costs.

Procedure

Locate the catalogue number and enter the *manufacturer invoice cost* for the component into the calculator. Do not include shipping costs, exchange or any other cost. The cost used for the generic catalogue number must be the manufacturer's invoice cost only. The calculator will automatically add mark-up, shipping and labour costs.

Copy and paste the calculation into the Benefit Note on E-Business. Be sure to also indicate the manufacturer and model number in the Benefit Note.

Costs over the indicated maximum are indicated in the calculator and are considered an upgrade.

Functional Levels

Lower Limb

<i>Level 0</i>	Does not have the ability or potential to ambulate or transfer safely with or without assistance and a prosthesis does not enhance their quality of life or mobility.
<i>Level 1</i>	The ability or potential to use a prosthesis for transfers or ambulation on level surfaces at fixed pace. This prosthesis is typical for the household ambulator.
<i>Level 2</i>	The ability or potential for ambulation with the ability to traverse low-level environmental barriers such as curbs, stairs, or uneven surfaces. This prosthesis is typical for the limited community ambulator.
<i>Level 3</i>	The ability or potential for ambulation with variable pace. This prosthesis is typical of a community ambulator with the ability to traverse most environmental barriers while participating in activities of daily living that require prosthetic use beyond simple locomotion.
<i>Level 4</i>	The ability or potential for prosthetic ambulation that exceeds basic ambulation skills, exhibiting high impact, stress, or energy levels. This prosthesis is typical of the prosthetic demands of the child or active adult functioning in the community.

Upper Limb

<i>Level 5</i>	The ability to enhance a patient's body awareness to improve quality of life and or prepare for the patient's future functional ability.
<i>Level 6</i>	The ability to use the prostheses for basic hand skill activities. Generally, these activities are required for lifting, stabilizing or holding objects between two extremities.
<i>Level 7</i>	The ability to demonstrate a high level of function with the prosthesis that enables a client to perform sophisticated, hand skill patterns. Some typical activities would include grasping and releasing, positioning (pre-position) of the terminal device, or changing to alternate terminal devices.
<i>Level 9</i>	The ability to demonstrate a high level of function with a myoelectric prosthesis that enables a client to perform sophisticated, hand skill patterns.

Microprocessor Knee				
UPGRADE	1 Microprocessor Knee Per 5 Years	3 - 4	P925	\$6,000.00 Grant
AADL provides a grant to those clients who are at least a Functional Level 3 and want to upgrade to a microprocessor knee. The grant will be paid directly to the Specialty Supplier once the microprocessor knee has been provided to the client (service date). The individual will own the microprocessor knee. AADL will not pay for repairs or maintenance of a microprocessor knee. The quantity/frequency limit of one microprocessor knee grant per five years will be strictly enforced. A client declaration for the microprocessor knee must be completed and signed prior to the authorization being submitted. A copy of this declaration must be kept on the client file in addition to the AADL client declaration form. AADL will not replace any prosthetic knee provided within 2 years due to client preference.				
Ossur Mauch Graphite Frame With Hydraulic SNS				
MKN01360	1 Per 2 Years	3 - 4	P247	\$4,364.61 Each
Ossur Gaitmaster Knee With Mauch SNS (250-350 lbs.)

Finishing

Maximum quantity of one of each type of "finishing" per socket.

No QFR is required if the "finishing" is being authorized on the same authorization as a new, eligible socket. This includes first time socket procedures, QFR socket replacements, early replacement sockets, and bilateral sockets. The "finishing" **must** be included on the same authorization as the socket to be exempt from the QFR process. However, there must be clear explanation of the rationale in the override notes.

If being replaced without an eligible socket and an override is required, there must be an approved QFR.

Endoskeletal Finish

Hip Disarticulation (HD) P-CF-72	1 Finish Per 2 Years	1 - 4	P082	\$1,744.15 Each
Knee Disarticulation (KD) CF-42	1 Finish Per 2 Years	1 - 4	P062	\$1,140.40 Each
Proximal Femoral Focal Deficiency (PFFD)	1 Finish Per 2 Years	1 - 4	P034	\$1,097.99 Each
Transfemoral (TF)	1 Finish Per 2 Years	1 - 4	P575	\$1,186.84 Each
Transtibial (TT)	1 Finish Per 2 Years	1 - 4	P052	\$764.10 Each

Exoskeletal Finish

Ankle Disarticulation (AD) P-CF-21	1 Finish Per 2 Years	1 - 4	P013	\$584.04 Each
Knee Disarticulation (KD) P-CF-41	1 Finish Per 2 Years	1 - 4	P025	\$1,584.44 Each
Proximal Femoral Focal Deficiency (PFFD) P-CF-61	1 Finish Per 2 Years	1 - 4	P032	\$1,584.44 Each

Upper Limb Myoelectric Prosthesis				
Criteria - Adults • Must have a wearing pattern established by using a conventional prosthesis for at least 1 year - exceptions to be discussed with AADL. Criteria - Children • Must have had a body powered-activated terminal device for at least 1 year prior to Myoelectric fitting. • Must be at least 2 years old. 1. Clients are eligible for a conventional OR Myoelectric prosthesis. 2. No replacement/repair of a conventional prosthesis for 2 years after a Myoelectric prosthesis has been provided. 3. Wherever possible, Rehab involvement with the functional training of the Myoelectric device is supported by AADL. 4. AADL expectation is that recycled Myoelectric components should be used whenever possible (Exception: Electrodes). 5. For Myoelectric benefits that are indicated as "Prior Approval" submit manufacturer's invoice costs to AADL for approval. AADL will provide the maximum contributions and client upgrade costs.

Stump Protectors

Prescription Required

Stump Protector

1 Protector Per Limb Per 2 Years All **P926** **\$966.31 Each**

For immediate post-operative use. A socket adaptor may be added in order to determine the client's eligibility/suitability for a definitive prosthesis.

Check Sockets

Prescription for a definitive socket required prior to providing any sockets, including check sockets

Clear plastic formed around stump, standing static system, no mobility with socket.

Check Socket

Ankle Disarticulation/Chopart	2 Check Socket Per 2 Years	1 - 4	P113	\$840.09 Each
Hemipelvectomy	2 Check Socket Per 2 Years	1 - 4	P120	\$979.42 Each
Hip Disarticulation	2 Check Socket Per 2 Years	1 - 4	P119	\$979.42 Each
Knee Disarticulation	2 Check Sockets Per 2 Years	1 - 4	P116	\$840.09 Each
Proximal Femoral Focal Deficiency	2 Check Sockets Per 2 Years	1 - 4	P498	\$830.77 Each
Transfemoral	2 Check Sockets Per 2 Years	1 - 4	P117	\$840.09 Each
Transtibial	2 Check Socket Per 2 Years	1 - 4	P114	\$784.33 Each
Upper Extremity	2 Check Sockets Per 2 Years	5 - 7, or 9	P122	\$683.43 Each

Temporary Sockets

Prescription for a definitive socket required prior to providing any sockets, including temporary sockets.

For a client with a new amputation or client with complex issues with volume and/or shape.

Criteria: Where multiple sockets will be required due to anticipated swelling and/or shape and/or volume change of the stump. If a check socket is required, only 2 temporary sockets will be funded. Ambulation with socket.

Must indicate criteria in E-Business Benefit Note.

Temporary Socket

1st Temporary Socket	3 Temporary Sockets Per 2 Years	All	E703	\$1,352.63 Each
2nd Temporary Socket	3 Temporary Sockets Per 2 Years	All	E705	\$1,259.75 Each

Must clearly document clinical justification for second temporary socket.

Benefits for Upper or Lower Limb

----------------------	---------------------------------	-----	------	-----------------

Must clearly document clinical justification for third temporary socket.

Additions to Lower/Upper Limb Procedures

Maximum quantity of one of each type of "addition" per socket.

*No QFR is required if the "addition" is being authorized on the same authorization as a new, eligible socket. This includes first time socket procedures, QFR socket replacements, early replacement sockets, and bilateral sockets. The "addition" **must** be included on the same authorization as the socket to be exempt from the QFR process. However, there must be clear explanation of the rationale in the override notes.*

If being replaced without an eligible socket and an override is required, there must be an approved QFR.

Lock Systems

Maximum quantity of one of each type of "lock system" per socket.

No QFR is required if the "lock system" is being authorized on the same authorization as a new, eligible socket. This includes first time socket procedures, QFR socket replacements, early replacement sockets, and bilateral sockets. The "lock system" **must** be included on the same authorization as the socket to be exempt from the QFR process. However, there must be clear explanation of the rationale in the override notes.

If being replaced without an eligible socket and an override is required, there must be an approved QFR.

Prosthetic Modifications and Repairs

AADL will not fund any modifications or repairs to a prosthetic device within ninety (90) days of provision of the device. Specialty Suppliers are required to provide all necessary follow-up to ensure the device is able to be used for the purpose intended without additional cost to AADL or the client.

Activities not considered a repair benefit:

- trialling new components
- trimming/mods to new gel liners
- gait training
- replacement of components that have a specific catalogue number in the approved product list (joints, lock systems, etc.)
- Basic maintenance of a prosthesis, for example cleaning of the device, is the client's responsibility.

Specialty Supplier must document the nature of the work completed and the clinical justification in the E-business benefit notes for all authorized modifications and repairs.

Alignment

Prosthetic Realignment	3 Alignments Per 12 Months	All	P718	\$185.77
------------------------	----------------------------	-----	------	----------

Commercial Components

Major Modification or Repair	5 Commercial Modifications/Repairs Per 12 Months	All	P772	Prior Approval
------------------------------	--	-----	------	----------------
